

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	15 August 2026
Team ID	
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Service Portal Access	Provide employees access to the Employee Raise Issue service through the Requesting Portal.
FR-2	Employee Issue Information Capture	Capture Requester, Category, Subcategory, State, and Short Description through Record Producer variables.
FR-3	Validation and Issue Classification	Apply Category–Subcategory dependency and configured field validation, including Short Description mandatory behaviour when State is New.
FR-4	Employee Issue Record Creation	Map Record Producer variables to the Employee Issue custom table and create a structured Employee Issue record after successful submission.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Service Portal should provide a simple and structured interface that allows employees to raise an issue without directly accessing the underlying custom table.
NFR-2	Security	Access to the Employee Raise Issue service and underlying records should be controlled through ServiceNow roles, permissions, and configured access controls.
NFR-3	Reliability	Valid submissions should consistently create Employee Issue records with the information captured through the Record Producer.
NFR-4	Performance	The Record Producer and Service Portal submission process should respond within an acceptable time under normal usage conditions.
NFR-5	Availability	The Employee Raise Issue service should be available to authorized users whenever the ServiceNow Service Portal is available.
NFR-6	Scalability	The solution should support the addition of new categories, subcategories, departments, assignment requirements, validations, and related employee service processes.
